

I wish to let the FCC know that I am NOT in favor of the FCC preempting state Telephone Privacy laws in favor of adopting one national standard. Since getting on Indiana's "No-call list" I am able to enjoy my evenings home. I see NO reason the federal government needs to become involved in something we in Indiana have already taken care of. I think the law as Indiana has it is great as it is, please do not mess it up with federal loop holes.
